

Lakes and Beaches Committee

April, 2024

Members present: Kent Campbell-Chair, Brian Fink, Greg Kirkpatrick, Tom Selm

1. An update on the Clean Flo evaluation was given. Anticipating a formal report soon.
2. Dredging of any form should be accompanied by efforts to reduce/eliminate run off of soil, leaf matter, etc. Each committee member has been asked to contact a vendor or explore an option to reduce runoff of soil, leaves, and other material.
3. Fish populations the current fishing guidelines led to a robust discussion. Our MDC representative has previously recommended recording of catches, followed by recommendations from this data. MDC also plans to perform electrofishing surveys of at least on of our lakes in May. Further, data from several years of the monthly bass fishing tournaments on Autumn Lake may expedite his recommendations.
4. Rinse station options were reviewed. A survey will answer some basic questions regarding it's construction.

5. Food service vendors for the Autumn Lake beach will require scheduling by this committee, and approval from Events Oversight. Four Lakes is investigating the feasibility of providing a limited item menu with delivery to the beach.
